

Protect Your Business from Web-based Threats

No matter what your business is today, most businesses provide internet access to employees in order to keep their business competitive and productive, with the result that protecting data and monitoring internet use are key priorities, even for the smallest IT team. It seems that every day a new threat emerges to threaten data security, including spyware, keylogging, phishing, pharming and worms. How can you protect your critical data assets when firewalls and antivirus software alone are just not enough protection? With Resilience CWR security solutions and Websense's web filtering and security applications.

Benefits

- Fast, easy installation and preinstalled software with intuitive interface
- Self-configuring modules that lower staff burden for deployment, administration and recovery
- Resilience world-class Support programs and Continuous Secured Ownership (CSO)
- Purpose built Websense appliance based on a hardened Linux kernel

Why You Need Websense

It seems that every day a new threat to data security emerges, including spyware, keylogging, phishing, pharming and worms. How can you protect your critical data assets when firewalls and antivirus software alone are just not enough? Websense offers the industry's leading web security solution that protects your business and its most sensitive data and intellectual property against the potential dangers exposed by users browsing the web. Websense web security applications add an additional layer of web security against endpoint risks in an overall security strategy, enabling IT teams to identify threats and block access at Internet gateways.

- Network Agent Only - For distributed environments where Network Agent is needed in remote locations.

Continuous Secured Ownership

The Resilience CWR delivers purpose-built web security appliances optimized to deliver the highest levels of performance, loaded with Websense Web filtering and security applications.

Resilience offers comprehensive support plans with many options available, so you can be guaranteed the right level of support for your organization. Resilience offers these support programs in conjunction with our landmark Continuous Secured Ownership (CSO) program.

Please contact us today to learn more about CSO and how it helps to eliminate End-of-Life costs as well as dramatically reduces the cost of upgrades.
